PREMIUM ELECTRIC FIRES

SHOWROOM
EXCLUSIVE

www.toast-e.uk

1st Edition

Freestanding

The toast-e freestanding stove features advanced LED 3D holographic projection for modern homes and living.

A freestanding wood-burning stove is the central focus, positioned against a rustic stone fireplace wall. The stove is black with a glass-paned door showing a fire of logs. A black flue pipe extends from the top. To the left, a large potted plant stands near a window with white curtains. To the right, a wooden shelf holds books and decorative items. The floor is made of light-colored wood.

The freestanding model comes fully equipped with a signature log set design and has the options of accessories. This makes the stove the focal feature in any room.

Accessories include:
Magnetic flue pipe set
Log store
Black glass hearth

BENEFITS

The toast-e freestanding and inset can be controlled with the Smartphone App, remote control and convenient manual adjustment function. Choose a temperature of up to 31°C or enjoy the flame effect without heat.
