

e**flame**
Media Wall Fires

eflame

Symphony fires have been following the evolution of the fireplace since 1985.

We are proud to present our latest range of media wall fires, packed with cutting edge technology, designed for modern living.

eFlame Relax

Our fires are designed to perform and built to last, so just relax.

Manufactured from high quality materials and components you can rest assured your fire will not just be an amazing centre piece in your room, it will be safe and reliable for years to come.

State-of-the-art technology allows you to create the perfect ambience and temperature at the tap of a button or a holla to Alexa. We have a model to suit every room size so grab a cuppa, have a flick through the brochure, and dream about relaxing in front of your new media wall fire.

All fires come with a 5-year parts and labour warranty for added peace of mind.

Black Edition
Hyper-realistic LCD flame picture as standard on all fires.

eFlame Feature hot

Each fire in the range is feature hot, meaning whichever model you choose you're guaranteed to have all the latest tech to create your dream media wall fire.

Installation options

All our fires offer 3 flexible installation options for ultimate design flexibility. Single-sided, for flush mounting, hole-in-the-wall style 2-sided installation for mounting within a corner situation or 3-sided installation where all three sides are visible. (see design tip opposite)

Fire bed included

All fires have fuel bed components supplied in the box ready for you to easily set up the firebed. Included are high definition woodland logs, coloured and tinted crystals and granular material so you can really get creative and design your dream firescape.

Black Edition

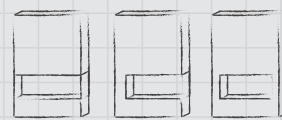

Ultra-low reflectory rear black glass displays a hyper-realistic LCD flame picture. Separate controls for the fuel bed and overhead lighting give optimum control to be able to create the perfect flame effect and colour effect for your mood or occasion.

Energy efficient heater

Manually or thermostatically controlled, the energy efficient 4-speed heater allows you to relax in the perfect temperature. Setting the temperature and speed is easy thanks to the supplied remote, phone app, push buttons (on fire fascia), or simply ask Alexa.

design tip

Consider how you want your fire to integrate with your media wall. Is it recessed, do you want to show all 3 sides of the glass or would a corner fire work best for you?
All 3 options are included with an eFlame fire.

Easy to control

Control the flame effect, colour and temperature using the remote control, through your phone using the supplied app or connect to Alexa. Push button controls are also featured discretely on the fire fascia for manual control.

eFlame The Fuel bed

Our included fuel bed contains all the essentials you need to create a hyper realistic fireplace.

Our included fire bed includes high-definition ceramic logs and granular material **(1)**, smoked tinted crystals **(2)** and bark chips **(3)** so you have plenty of options to create your perfect firescape.

symphonyfires.co.uk

1

2

3

design tip

Create an **ultra modern look** by using glass crystals on your firebed, then set the lighting of the fire to a purple or blue hue. **For a more traditional firescape**, use logs on the firebed and set the lighting to a more natural orange and yellow hue to give a cosy glow.

Your fire deserves the finest log kit...

Premium Log Kit

Upgrade to our premium real logs for the ultimate in firebed realism.

Our premium log sets are made using real logs, and creates an ultra-realistic fire bed. The log kit comprises variety of log sizes so you can create the perfect fire for your home.

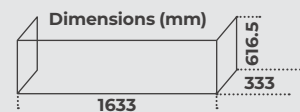

^ Made by hand and crafted from real logs for the ultimate realistic fire bed.

eflame 1600

Black Edition

Our most popular panoramic media wall fire, the 1600 fits into most room sizes and creates a focal point you won't forget!

The eflame 1600 is designed with the latest LCD technology along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire. The flame effect can be set to XX different settings and XX sound effects all from the comfort of your chair using your phone, tablet or supplied remote control.

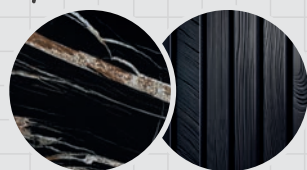

Full Spec page 22

For TV's up to size 60"

symphonyfires.co.uk

design tip

Use a mixture of materials on your media wall to create interest.

We've used dark wood slat wall panelling combined with an exotic granite that tones in with the coffee table, and results in the ultimate contemporary yet cosy scheme.

Try creating a mood board to test your ideas.

Ultra-realistic LCD flame picture on non-reflective darkened glass

Multi-coloured overbed lighting & underbed glow

Independent ember lights

Fuel bed pack includes high def logs, crystals & granular material

Thermostatic heater with 4 speeds

Control with full remote, app, Alexa or push buttons

6 sound effects or quiet mode

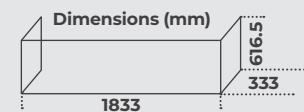

10&11

e**flame** 1800

Black Edition

For slightly larger living spaces, the 1800 creates maximum impact and can be used with TV sizes up to 75”.

The eflame 1800 is designed with the latest LCD technology along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire. The flame effect can be set to XX different settings and XX sound effects all from the comfort of your chair using your phone, tablet or supplied remote control.

For TV's up to size
75"

symphonyfires.co.uk

design tip

Be creative with your media wall design. A plain media wall with no storage may look great, but don't forget you can go to the full width of your wall if required and incorporate lots of useful storage like we have done here. **Incorporate LED lighting** so you can really set the mood.

12&13

Ultra-realistic LCD flame picture on non-reflective darkened glass

Independent ember lights

Fuel bed pack includes high def logs, crystals & granular material

Thermostatic heater with 4 speeds

Control with full remote, app, Alexa or push buttons

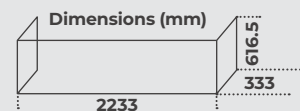

6 sound effects or quiet mode

eFlame 2200

Black Edition

For the largest living spaces where the 2200 creates a stunning panoramic statement, perfect with screens up to 85”.

The eFlame 2200 is designed with the latest LCD technology along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire. The flame effect can be set to XX different settings and XX sound effects all from the comfort of your chair using your phone, tablet or supplied remote control.

85"

symphonyfires.co.uk

14&15

design tip

Create a floating effect with large spaces. This media wall uses a clever shadow gap at it's base to make it look like it is floating. This breaks up the vast expansive wall into two sections to cleverly directs the eye towards the offset screen.

Ultra-realistic LCD flame picture on non-reflective darkened glass

Multi-coloured overbed lighting & underbed glow

6 sound effects or quiet mode

e**flame** 750sl *Black Edition*

Perfect for creating a statement in a smaller space, or within a mantel. All the same tech as our other fires, but in a more slimline package!

The eflame 720sl is designed with the latest LCD technology along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric wall fire. The flame effect can be set to XX different settings and XX sound effects all from the comfort of your chair using your phone, tablet or supplied remote control.

Thermostatic heater with 4 speeds

Control with full remote, app, Alexa or push buttons

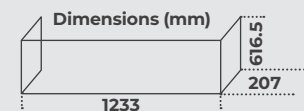

6 sound effects or quiet mode

eFlame 1200sl Black Edition

An identical panoramic picture to the 1200, but with a slimline depth of only 190mm makes this fire perfect for the smaller space.

The eFlame 1200sl is designed with the latest LCD technology along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric wall fire. The flame effect can be set to XX different settings and XX sound effects all from the comfort of your chair using your phone, tablet or supplied remote control.

Full Spec page 24

For TV's up to size
50"

symphonyfires.co.uk

design tip

Use the magic of paint to make your room appear longer or taller. Particularly useful in smaller rooms where you want your room to appear longer, paint the whole media wall and either side in the same colour. Painting the media wall in a contrasting colour will make the room appear taller.

Ultra-realistic LCD flame picture on non-reflective darkened glass

symphonyfires.co.uk

design tip

Get creative with storage.

Don't forget every fire can be 1, 2 or 3 sided, meaning you can easily incorporate storage into one or both sides of your media wall!
